***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 7, 10, 13, 16, 19-20, 23 and 45, drawn to a system and method for providing transmission page to user, classified in class 709, subclass 217.
  - II. Claims 2-3 and 30, drawn to a system and method for transmitting information to desired transmission destination, classified in class 340, subclass 995.23.
  - III. Claims 4, 8, 11, 14, 17, 21, 24, 27, 31, 33, 35, 37, 39-40, 42 and 46, drawn to a system and method for displaying the desired information to user on user terminal, classified in class 715, subclass 738.
  - IV. Claims 5-6, 9, 12, 15, 18, 22, 25, 28-29, 32, 34, 36, 38, 41, 43, drawn to a system and method for displaying graphic user interface to user for selecting, classified in class 345, subclass 594.
  - V. Claims 26 and 44, drawn to a system and method for switch transmitting mode, classified in class 712, subclass 229.

Art Unit: 2154

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV and V are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01).

In the instant case, invention I is directed to a method comprises the steps of displaying an information transmission page and transmitting desired information by this page. The invention II is directed to a method comprises the steps of designating a transmission destination to the desired information. The invention III is directed to a method comprises the steps of displaying electronic information on user's terminal. The invention IV is directed to a method comprises the steps of allowing user selects icon from the user interface. The invention V is directed to a method comprises the steps swiching the transmission mode in which the destination is set.

3. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the four inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

Art Unit: 2154

(a) the Group I search (claims 1, 7, 10, 13, 16, 19-20, 23 and 45) would require use of search **Class 709, subclass 217**.

(b) the Group II search (claims 2-3 and 30) would require use of search **Class 340, subclass 995.23**.

(c) the Group III search (claims 4, 8, 11, 14, 17, 21, 24, 27, 31, 33, 35, 37, 39-40, 42 and 46) would require use of search **Class 715, subclass 738**.

(d) the Group IV search (claims 2-3 and 30) would require use of search **Class 345, subclass 594**.

(e) the Group V search (claims 26 and 44—) would require use of search **Class 712, subclass 229**.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

5. Applicant is reminded that the required for response to this requirement is 30

Art Unit: 2154

days, not one month.
